eCrate 400v/200hp

CHEVROLET PERFORMANCE eCRATE FAQs

CONSUMER

PACKAGE DETAILS

Q. Is the eCrate street legal?

- a. Yes. This part is 50-state emissions street legal when installed and used as described in the CARB executive order (please refer to EO# B-88). Visit www.chevrolet.com/performance-parts/emissions for more details.

Q. What are the horsepower and torque of the eCrate?

- a. The eCrate motor generates 200 hp/150 kW and 266 lb.-ft./360 Nm of torque.

Q. Do I need a transmission?

- a. The current eCrate kit requires a GM 4-speed automatic transmission with an external mode switch (e.g., 4L60, 4L65, 4L70, 4L75 Transmissions). This helps to make the eCrate conversion easier for vehicles that already have a conventional driveline, plus it provides extra torque in lower gears and extra speed with overdrive. We are working on bringing a direct drive variant option to our eCrate portfolio.

Q. What is included in the optional installation kit for transmission (P/N 19433630)?

- a. Low Stall Torque Converter, Transmission Control Module Kit, Flex Plate, Hardware (select bolts).

Q. Can I use a manual transmission?

- a. A conversion kit for manual transmissions is not yet available.

Q. Can I increase horsepower?

- a. The first-ever Chevy eCrate conversion kit has a locked system that does not allow you to increase horsepower at this time.

BATTERY SPECS

Q. What is the size of the battery in the eCrate package?

- | | |
|--|--------------------------------------|
| a. - Height at front: 7.3 in. (185 mm) | - Overall length: 71.1 in. (1807 mm) |
| - Height at rear: 13.7 in. (347 mm) | - Weight: 947 lb. (430 kg) |
| - Overall width: 50.2 in. (1276 mm) | |

Q. What is the battery chemistry?

- a. Nickel manganese cobalt (NMC) lithium ion

Q. What is the weight of the battery?

- a. 947 lbs.
-

Q. What is the battery range?

- a. Battery range will vary depending on your vehicle's weight, your drive style, temperature, terrain, battery age, loading, use, and maintenance.
-

Q. What is the voltage?

- a. 400V
-

Q. What are my charging options?

- a. Level 1 Charger (120V): eCrate will charge 1% in one hour*

Level 2 Charger (240V): eCrate will charge 10% in one hour*

Level 3 Charger (400V): eCrate will charge 75% in one hour*

A Level 1 charger comes with the eCrate package, and a Level 2 charger can be purchased (GM Part # 85163382). eCrate is capable of charging on all Level 3 public charging options/stations.

*Actual charge times will vary based on battery condition, output of charger, vehicle settings and outside temperature. See the vehicle's Owner's Manual for additional limitations.
