

The Most Authentic and Accurate Parts For Your Restoration

It was a chance find, based on a story recounted by a friend of a friend. But there it was – the classic muscle car you'd been searching for, hidden beneath a dusty tarp in an old barn. You worked hard, but finally convinced the stubborn farmer to sell it.

With the car safely in your garage, the exuberance of the thrill of the hunt morphs into the realization that a careful and accurate restoration is needed to bring that vintage car back to its original glory. That means more hunting for the right parts; everything from the carburetor to the clamps that hold the fuel lines in place.

GM knows it's the little things that count with a restoration. With countless resources for restoration components, assurance that you're getting the most authentic and best-fitting parts comes when you buy officially licensed GM

Restoration Parts. They're made by manufacturers who build to GM's specifications and label them accordingly. Many even use original tooling for unparalleled accuracy in look, feel and performance.

You can find licensed GM Restoration Parts for everything from the grille badge for a 1969 Camaro to the body shell itself for that Camaro. That's right – an entire classic Camaro body!

Before purchasing any reproduction parts for your valuable project, make sure the manufacturer is licensed by GM Restoration Parts.

With mint condition on your mind, licensed GM Restoration Parts are the only parts that should go into your barn-find beauty.
