**OFFERS UP TO 52 MPG HIGHWAY**

This Diesel makes a difference.

Ready to take things up a notch? Meet the 2018 Cruze Diesel Sedan, featuring a 1.6L turbocharged engine that offers up to an incredible 52 MPG on the highway! That’s the highest highway fuel economy offered by any non-hybrid/non-electric vehicle in America; so you’ll always be ready to go the extra mile.

**INTRODUCING CRUZE DIESEL HATCHBACK.** The new Cruze Diesel Hatchback offers exceptional efficiency, with up to 48 MPG highway. The ECOTEC® 1.6L Turbo-Diesel is available with a choice of a 6-speed manual or a 9-speed automatic transmission.

**ECOTEC EFFICIENCY.** Cruze offers a combination of power and efficiency that can help keep you going longer between fill-ups. The ECOTEC 1.4L turbocharged engine paired with the available 6-speed automatic transmission provides a premium driving experience that offers up to 40 MPG highway and a maximum highway range of up to 540 miles per tank.

**SMOOTH IN THE TURN.** Cruze steering, suspension and braking systems are designed to deliver tight handling that make every model a blast to drive. Advanced chassis systems provide nimble, agile handling and comfort, whatever scenic route you choose to take.

**STOPPING POWER.** Control is important in a vehicle that can take you from 0 to 60 mph in 7.7 seconds. And Cruze Sedan can do just that. Standard Duralife™ brake rotors on all models feature corrosion-resistant technology, providing protection against rust that can help prevent steering wheel shudder during braking.

**240 LB.-FT. OF TORQUE**

**1.6L TURBO-DIESEL ENGINE**
SAFETY STARTS WITH YOU. Safety features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner’s Manual for important feature limitations and information.
WE HELP YOU COVER YOUR BACK, FRONT AND SIDES.

**FORWARD COLLISION ALERT WITH FOLLOWING DISTANCE INDICATOR.** This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Cruze is following a detected vehicle much too closely.

**LANE KEEP ASSIST WITH LANE DEPARTURE WARNING.** At speeds above 37 mph, this available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal.

**AVAILABLE LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT.** Radar sensors in the rear corners of the vehicle help detect fast-approaching vehicles in the adjacent lanes as well as vehicles in the side mirror blind zones. Amber icons in the exterior mirrors indicate a vehicle’s presence.

**REAR CROSS TRAFFIC ALERT.** This available radar-based feature alerts you to crossing traffic behind your Cruze when backing up. Audible warnings, as well as visual alerts on the rear vision camera screen, are triggered if approaching vehicles are detected.

**REAR VISION CAMERA.** When traveling in reverse at low speeds, the standard rear vision camera provides a real-time picture of the area immediately behind your Cruze on the touch-screen display.

**REAR PARK ASSIST.** This available feature helps you back up by sounding an audible alert when it detects certain stationary objects in close proximity behind the vehicle.

**INTELLIBEAM HEADLAMPS.** When oncoming headlamps are sensed or when taillamps are detected in front of you, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams.
1. **NERVES OF STEEL.** Front and rear “crush zones” are designed to compress in a controlled manner, helping absorb and channel energy away from the cabin.

2. **LEARN BETTER DRIVING HABITS.** Perfect for new drivers and those who want to improve their skills, Teen Driver technology helps to encourage better driving habits in a number of ways, like muting the audio system when front-seat occupants aren’t wearing their safety belts, and giving audible and visual warnings when the vehicle is traveling over a predetermined speed.

3. **ONSTAR® AUTOMATIC CRASH RESPONSE!** In a crash, built-in sensors can automatically connect you to a specially trained, Emergency Medical Dispatch–certified Advisor who can help you get the assistance you need—even if you can’t ask for it. Advisors can use GPS technology to pinpoint your location and request emergency help. OnStar Automatic Crash Response is included in the OnStar Safety & Security Plan.

ENGINES Chevrolet products are equipped with engines produced by GM Global Propulsion Systems or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

CHEVROLET CONNECTED SERVICES AND ONSTAR Connected vehicle services require a paid connected vehicle services plan or trial and connected hardware, vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. OnStar acts as a link to existing emergency service providers. Visit onstar.com for coverage map, details and system limitations.

A NOTE ON CHILD SAFETY Always use safety belts and the correct child restraint for your child’s age and size, even with air bags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. See the Owner’s Manual and the child safety seat instructions for more safety information.
